

VISIPRO PALLET DEFLECTORS

High Visibility Deflectors to Protect Pallet Rack Uprights against Pallet Impacts.

High Visibility Pallet Deflectors

- ▶ Designed to mitigate the effect of pallet impacts against rear and front pallet racking uprights.
- ▶ Reduces rack maintenance and rear upright damage by up to 90%.
- ▶ Affordable prices and Quick Installation.
- ▶ Made from injection molded, high-impact plastic compound with energy absorbing and self-reforming properties.
- ▶ The safety yellow colour ensures high visibility, enhancing the forklift driver's ability to identify the upright's location.
- ▶ Available in two models: The AX115 for the rear uprights of pallet racks, and the AX140 for front uprights with protectors.
- ▶ The AX115 for rear upright has a 115mm internal diameter and height of 120mm, allowing ample room to be placed over the anchoring footplate of the upright and within the anchor bolts.
- ▶ The AX140 for the front upright has a 140mm internal diameter and height of 120mm, and is placed around the front upright mounted with Visipro Pallet Rack Protector of sizes AVS1, AVS2, AVA, AVB or AVC.
